---

**Switchfin** is an open source uClinux telephony distribution running on [Blackfin](#) based CPUs. Currently the supported hardware targets are

- Analog PBXs - IP01, IP01p, IP02, IP04, IP08 (Manufactured by [Atcom](#) )
- Digital PBXs - BR4 Appliance and PR1 Appliance (Copyright by [SwitchVoice](#) )

Keep in mind that with a small modifications Switchfin can run on a virtually any Blackfin based system.

We encourage everybody willing to add support for its hardware in **Switchfin**

### **Where can you purchase those hardware?**

One option is to contact the manufacturers directly.

**Switchfin** software however is supported by [SwitchVoice Ltd.](#) so if you would like to support **Switchfin** activity we encourage you to purchase your target from [SwitchVoice Ltd.](#)
